

Ex Hazardous Vertical Float Switch

TM-DEE-VFS-FP

The Deeter VFS-FP is a vertical magnetic float switch for control and indication of a liquid level while in a potentially explosive atmosphere. The VFS-FP is also available with Marine Type Approval.

Ex tb IIIC (*) Db $-40^{\circ}\text{C} \leq \text{Ta} \leq +85^{\circ}\text{C}$

IP68

* Temperature class options to suit environment and process temperatures

T5 / T100°C for process temperatures $\leq 85^{\circ}\text{C}$

T4 / T135°C for process temperatures $\leq 125^{\circ}\text{C}$

T3 / T200°C for process temperatures $\leq 190^{\circ}\text{C}$

ATEX Certificate: ExVeritas 17ATEX0301X

IECEX Certificate: IECEX EXV 17.0030X

Refer to certificate for clarification of directive code and equipment protection level.

Features include

- ATEX and IECEX approved.
- Marine Type Approval available.
- Stainless Steel 316L housing and wetted components.
- Suitable for gas and dust environments.
- IP68 Ingress protection.
- Voltage free reed switch contacts
- Narrow sensor stem and external mounting.
- Suitable for high liquid temperatures.
- Custom options available

All Specifications are subject to change without notice

Ex Hazardous Vertical Float Switch

TM-DEE-VFS-FP

Type	Specification	
Sensor technology	Magnetic float with reed switch	
Sensor tube and wetted materials	Stainless steel 316L	
Connection head material	Stainless steel 316L	
IP rating with suitable cable gland	IP68	
Approximate weight:	1.383 kg	
Float Diameter: Specific gravity:	52.6mm : 0.6	
Maximum liquid temperature:	-20 to +85°C	125°C/190° C max, - 55°C min on request
Maximum head temperature	-20 to +80°C	Note 1
Maximum operating pressure	150PSI / 10Bar standard	Note 2
Thread connection-Sensor tube	½" NPT	
Thread connection-Tank Mounting	2" BSP	
Thread connection-Wiring port	M20X1.5	
Connection head height	95mm	
Power supply:	Voltage free contacts	
Switch rating:	0 to 240vac. 1Amp. 50Watts max	Note 3

Note 1: When this equipment is intended to be used in a liquid with a process temperature above 85°C it is an essential requirement that the sensor head temperature is measured to determine if the ambient air cooling is sufficient to keep the head below 80°C. See installation manual for detail.

Note 2: The F/S FP sensor float and tube can withstand the stated pressure when sealed inside a tank. The connection head and resin seal to the sensor stem must not be pressurised. The standard zone0 fittings are rated at 10bar, these fittings are not part of the certified flameproof seal and should not be considered as part of an explosion proof containment. Please call our technical sales department regarding sensors for liquid pressures up to 31bar.

Note 3: The sum current drawn by all switch points must not exceed 1Amp total.

Note 4: Sensors suitable for higher temperatures are available.
